MAJOR TRAINING DOMAINS

- **Programmable Logic Controller (PLC)**
- **Human-Machine Interface (HMI)**
- **Supervisory Control and Data Acquisition (SCADA)**
- **Variable Frequency Drive (VFD)**
- **Servo Motion System - Motor & Controller**
- **Robot Automation with Vision Integration**
- **Industrial Safety Design for Automation**

  Focuses on the application of international safety standards such as IEC 61508, ISO 13849, IEC 62061, and Risk assessment in accordance with ISO 12100.
- **Industrial Multi Protocol Communication**

  EtherNet/IP, Modbus TCP, OPC UA, AnyBus, CAN-Bus, RS-485, USB, and RS-322 serial communication.
- **Project Engineering**

  Project management and planning, risk analysis and mitigation, budget estimation and cost analysis, BOM, and I/O list, Electrical Drawing practices, installation, T&C.

CORE AUTOMATION PLATFORMS COVERED

- ***Allen-Bradley (AB) Ecosystem***

  Studio 5000 / RSLogix, PLC, HMI, SCADA, VFD, Kinetix Servo systems, EtherNet/IP architecture, RSLinx Gateway OPC/IDE and integrated solutions
- ***Siemens Automation Platform***

  PLC and HMI integration with multi-protocol industrial communication and drive systems.
- ***Omron Automation Platform***

  PLC, HMI, and servo-based motion control systems.
- ***GIC Automation Platform***

  PLC, HMI, and industrial GSM-based control systems. for training and applications.
- ***Delta Automation Platform***

  PLC, HMI, and VFD integration for cost-effective automation solutions.
- ***Robotics Platform***

  DOBOT robot programming with vision integration and conveyor synchronization.
- ***Data Automation***

  GRAFANA application based dashboards for real-time and historical visualization with MS-SQL database and cloud integration. Industrial Advantech IoT Gateway Platforms for industrial communication servers and distributed I/O systenis using RS-485-based architectures.

TRAINING APPROACH

- **Industry-oriented practical curriculum**
- **Hands-on training with real** industrial hardware
- **Multi-brand automation exposure** Mentorship
- **industry professionals**
- **Participation in live industrial projects**

WHO CAN ATTEND THIS COURSE?

- Diploma / BE / BTech students and graduates (EEE / ECE / Instrumentation/ Mechatronics / Production / Automation)
- **Working professionals**
  Maintenance, Service, and Control system engineer
